AABIP 5TH ANNUAL CONFERENCE

BACKGROUND

The American Association for Bronchology and Interventional Pulmonology is pleased to announce our 5th Annual Interventional Pulmonology and Advanced Diagnostics Conference scheduled for August 11th to 13th, 2022 in Nashville, Tennessee. This event will serve as a forum to review and discuss the current concepts and recent advances in interventional pulmonology and advanced pulmonary diagnostic procedures as well as showcase new technological advances and research innovations of interest to interventional pulmonologists, advanced diagnostic pulmonologists, critical care specialists, thoracic surgeons, advanced nurse practitioners, physician assistants, trainees, and other healthcare providers. Since its' founding in 1992, the AABIP has been the unified source for information regarding the fields of Bronchology and Interventional Pulmonology. It is the only subspecialty organization that is specifically focused on the Interventional Pulmonology community with the sole mission to advance the care of patients with thoracic diseases through a synergy of innovative technologies, minimally invasive procedures, and transformative education and research. Interventional Pulmonologists are also uniquely focused on the diagnosis, staging and management of patients with lung cancer.

The AABIP is committed to expanding its educational offerings to our membership and to promote collaborative research advances. This annual meeting of the AABIP represents the preeminent gathering of the best and brightest in the field of Interventional Pulmonology.

Since our inaugural conference in 2018, we have consistently provided an unmatched conference experience with diverse participation, enthusiastic engagement, and superb interactions among all participants. During this meeting, the sessions are focused on current concepts and recent advances in Interventional Pulmonology. We also plan to explore new technological advances and tools developed to advance the care of our patients. Lastly, this meeting will spotlight innovative research efforts amongst our membership and the IP community at large.
